Claudio Cotrufo

Senior Full-Stack Engineer & Tech Lead

claudio.cotrufo.gm@gmail.com · Turin, Italy
linkedin.com/in/claudiocotrufo

PROFESSIONAL PROFILE

Senior full-stack engineer and tech lead with 9+ years on enterprise web platforms in **C#** / **.NET** and **Angular**. At **MSC** leads development on **Angular 17** projects, shapes the architecture of the **Sitecore 10** platform and supervises the release cycle on **Azure DevOps**. Has trained and mentored junior developers in each of the last three roles while staying hands-on in the codebase.

EXPERIENCE

Tech Lead, Frontend — Jul 2022 — Present
MSC Mediterranean Shipping Company — Turin, Italy

Senior developer on **Sitecore 10** web platforms hosted on **Microsoft Azure**, and frontend tech lead on several **Angular 17** applications.

- Set technical direction on the **Angular 17** projects and delivered senior-level production code.
- Drove architectural decisions for the frontend and its **Sitecore 10** integration.
- Supervised the release cycle and its CI/CD pipelines on **Azure DevOps**.
- Designed and built reusable **Alpine.js** components for **Sitecore** renderings on **ASP.NET** and **C#**.
- Mentored the junior developers on the team.

Software Engineer / Experienced Consultant — Feb 2021 — Jul 2022
Welol

Consultant delivering **.NET** and **Angular** web applications, deployed through CI/CD on **Microsoft Azure**.

- Built web applications in **C#** on **.NET Framework** and **.NET Core**, with **Razor**, **Blazor** and **Angular** front ends.
- Extended **nopCommerce** and built interfaces on **DevExpress** / **DevExtreme** components.
- Integrated **Keycloak** for authentication.
- Ran the **Azure DevOps** pipelines and covered key user journeys with **Cypress** tests.
- Owned onboarding and mentoring for new junior hires.

Software Engineer / Experienced Consultant — Oct 2018 — Feb 2021
Amaris — Turin, Italy

Consultant on client web applications, placed in a team-lead track.

- Designed and built single-page applications in **Angular 6+**, **TypeScript** and **React**.
- Developed **C#** back ends on **.NET Framework** and **.NET Core**, wired with **Autofac** dependency injection.
- Added real-time updates to client applications with **SignalR**.
- Trained junior developers joining the team.
